

## **VAA Status and Targets:**

# **Portable, Objective Baseline of VA Medical Center Workflow**

5/20/25

VA Application Analytics (VAA)  
Office of Clinical Informatics  
Digital Health Office  
Veterans Health Administration  
U.S. Department of Veterans Affairs

# VAA

## Baseline the Clinical Workflow of any VA Medical Center

Objective: **automatically** report on the **complete clinical workflow of any medical center in an objective, portable form** to [a] **recommend workflow improvements** [b] **aid workflow migration** of the same workflow to new systems (configurations, training)

Approach:

- Non-invasive Capture and Reduction of the clinical application traffic generated by all users of an entire medical center for a 30-day period
- Replay every class of center-specific workflow to ensure reduction is complete
- Generate **Medical Center Clinical Workflow Reports and Configurations**
- This approach could be taken with any system or EHR (“Portable”, “Objective”)
- Use for migration: Focused Training (what’s changed?); Configurations to migrate Workflows

# VA Clinical Workflow

## Centered around Orders and Templated Notes (“Smart Forms”)

CPRS User Guide content (620 pages) reflects Workflow types and importance

- The “Orders” sections (Meds, Orders, Consults, Labs) represent **68.81%** of the pages.
- The “Notes” sections (Notes, Surgery, Discharge Summary) represent **15.85%** of the pages.
- Other data entry (Problem, Vital ...) is simple and not at all custom
- Summaries in Coversheet and elsewhere leverage ordered items and note types

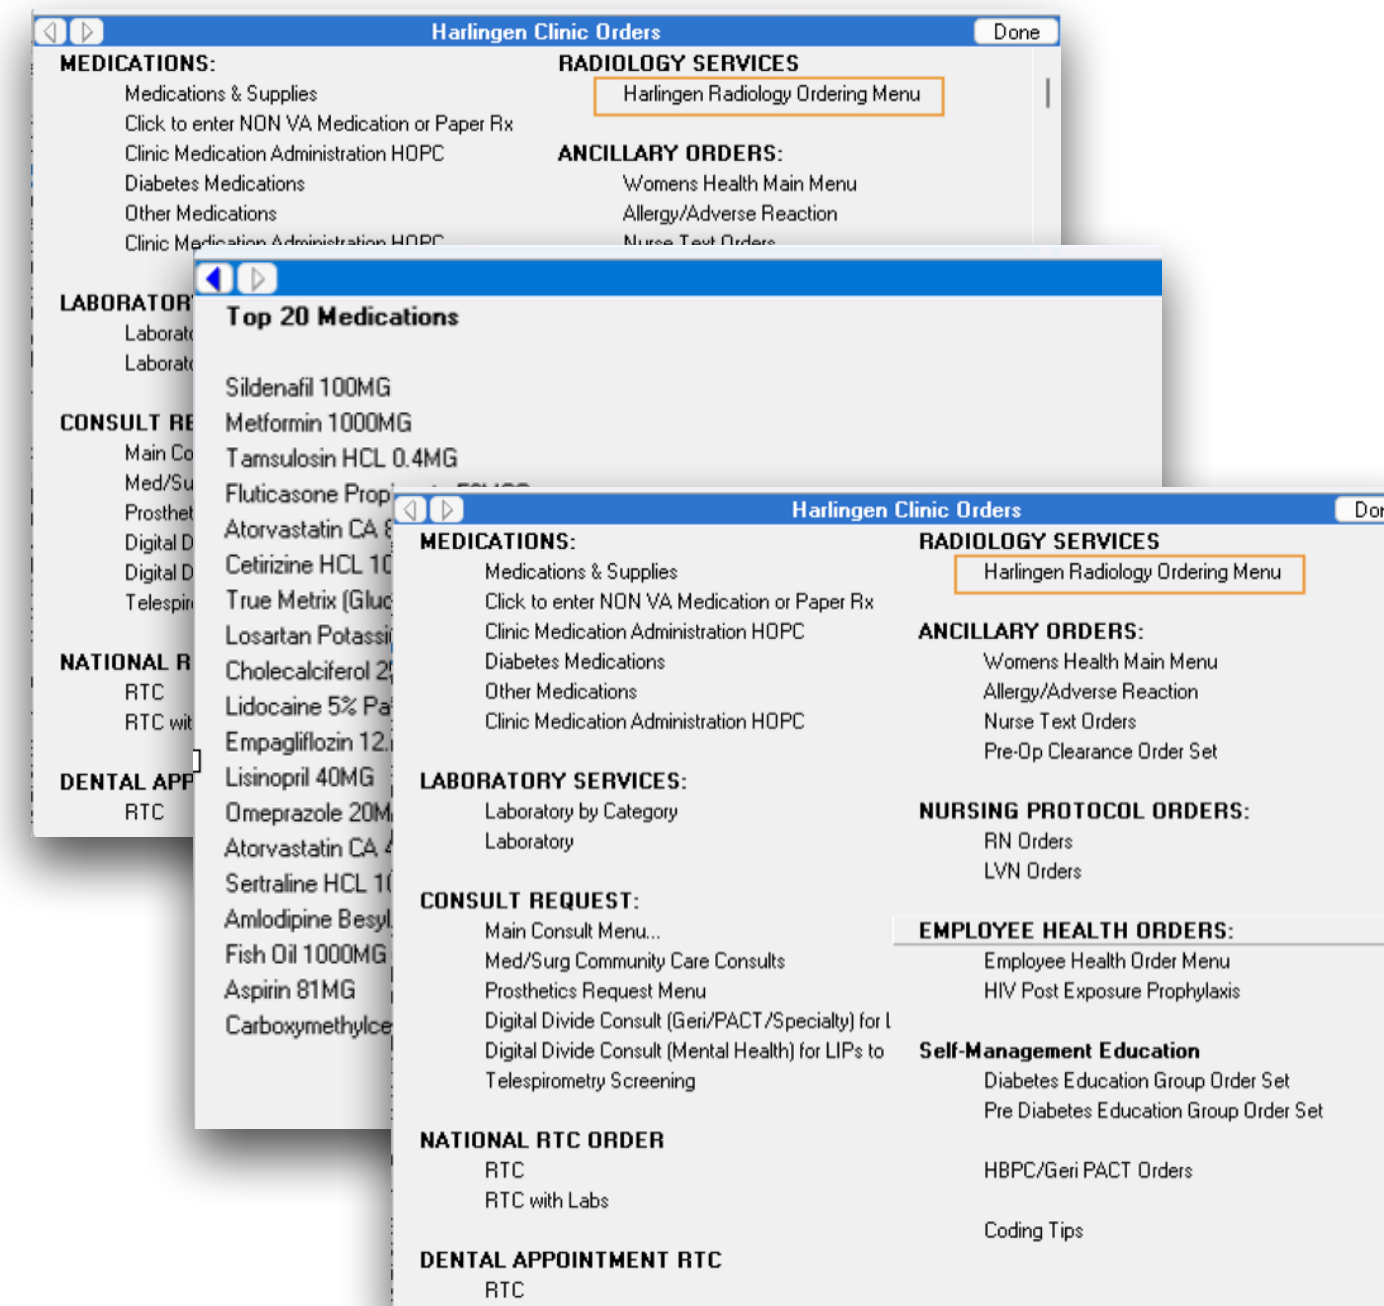

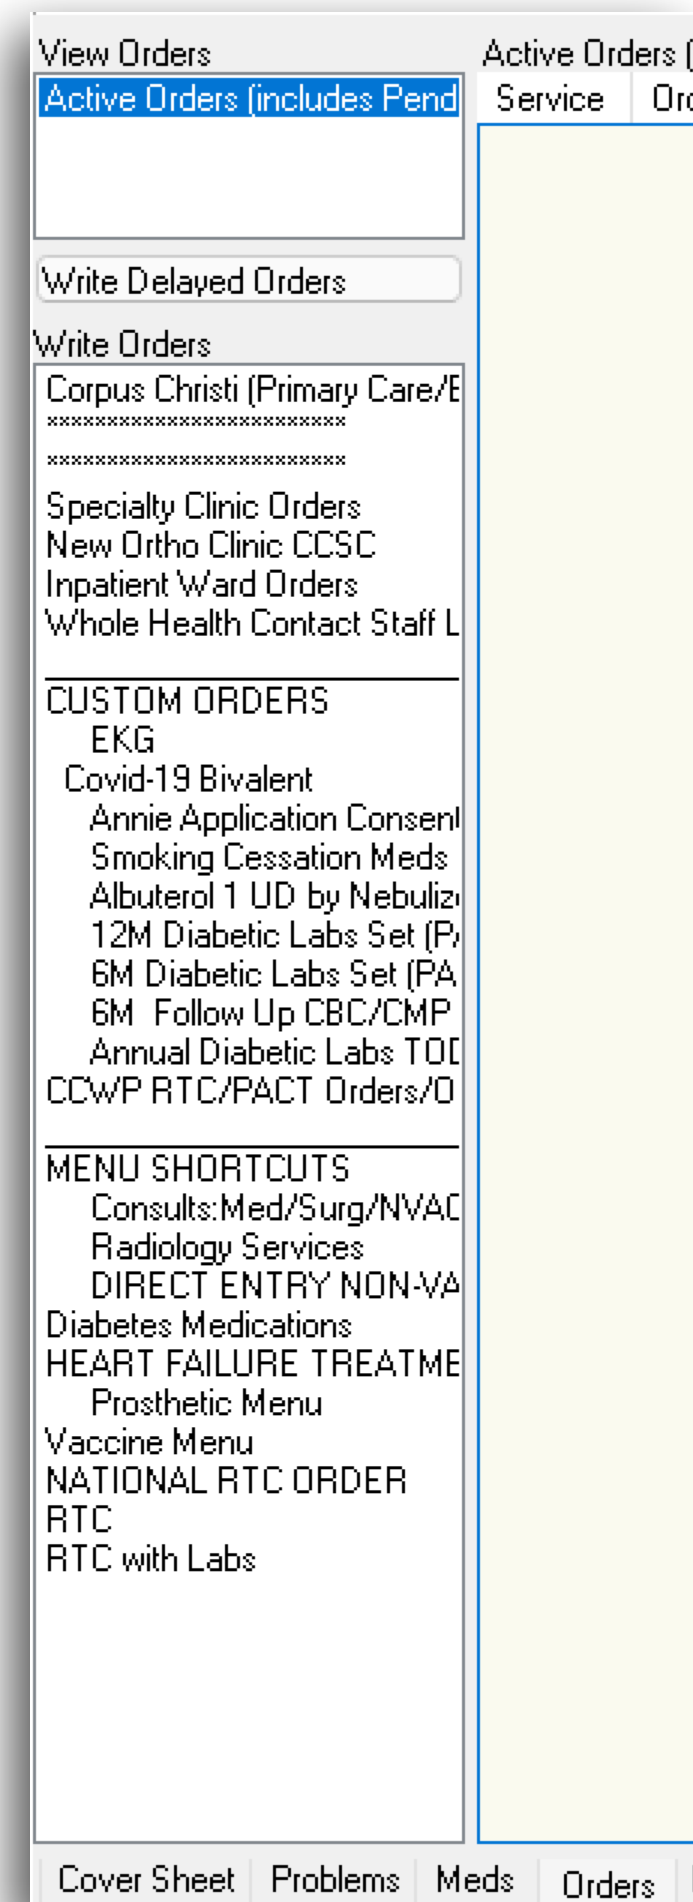

Section	Pages	% of Pages
Coversheet	33	8.17%
Problems	11	2.72%
Immunizations and Skin Test	6	1.49%
Meds	64	15.84%
Orders	180	44.55%
Notes	54	13.37%
Consults	21	5.20%
Surgery	5	1.24%
Discharge Summary	5	1.24%
Labs	13	3.22%
Reports	12	2.97%

# Workflow: Navigation that leads to Actions

## Navigation: Root Menus + series of Nested Menus

### Root Menus (Vertical side bar)

- Entry point for other menus or popular actions
- **Specialized for Medical Discipline, Division, ...**
- VCB: 13
- Omaha: 1,595
- (100x difference)

### Nested Menus

- Reflect the important location and groupings for care
- **Doctors are used to these site-specific organizations**
- VCB: 523  
(max nesting 12)
- Omaha: 5,392  
(max nesting 17)
- (10x difference)

# Workflow: Navigation that leads to Actions

Reason for Request: MRI, LUMBAR SPINE W/O CONTRAST

Total Number of Required Fields without Values: 4

(Evaluation criteria referenced from): ♦

**Diagnostic Evaluation of Low Back Pain with Emphasis on Imaging - 2002** ♦♦

(Clinical Concern [select 2 or more]): ♦♦

☐ Fever

☐ Weight loss

☐ Adenopathy

☐ Hx of Intravenous Drug Use

☐ Hx of Cancer (explain below)

☐ ESR > 20mm/hr

☐ Failed conservative treatment

☐ Intolerable Symptoms

☐ Non VA MD order

☐ Other (explain below): ♦

♦♦ (MRI studies are absolutely contraindicated in patients with the following devices; please discuss with Radiologist before completing this order): ♦♦

Cardiac Pacemaker/ICD/Implanted Defibrillator ♦♦

Aneurysm Clips in the Brain

Starr Edwards Cardiac Valve Prosthesis (metal heart valve)

Cochlear Implant (middle ear implant)

Implanted Neural Stimulator

Exams cannot be approved unless all conditions are met and checked. ♦♦

☐ No contraindicated devices

☐ MRI compatible device (include vendor/model in history) ♦♦

☐ Patient is able to lay supine and prone

☐ Not claustrophobic

☐ No injections or procedures in area of interest x 2 weeks ♦♦

Please note that there are weight restrictions for MRI or CT Scans: ♦♦ Patient

# VAA Methodology

## Five Steps

- **Non Invasive Capture** of VistA RPC traffic for a 30-day period of a VA Medical Center: Focus is on CPRS traffic
- **Workflow Extraction:** Sequences of extracted RPCs represent workflow
- **Workflow Categorization**
  - Example: 7 types of Radiology Study, Quick Orders, Explicit Orders, Order Sets, Verify only Orders within these types
- **Workflow Validation:** Use Emulator to reproduce examples of all types to validate completeness
  - Example screens seen earlier in this slide deck are from the Emulator
- **Generate Reports/Configurations** from Categorizations

Example sequence of  
RPCs to Reduce

# VAA Year One

## Current Status (5/25)

- Rounding out Order Workflow Representation
- Establishing Note Workflow Representation
- Reduce two more 30-day periods of data as final representative VAMC workflow - **both Omaha and Valley Coastal Bend (VCB)**
- Deliver Medical Center Workflow Reports in browsable and document form, including configuration file samples (CSV)

# VAA Year Two Proposed (Full)

9/25 to 8/26

- Extend Workflow Modeling to include Community Care and Interfacility Consults (clinical workflow between VA Medical Centers and in the Community)
- Baseline Workflow Reports and Configurations for three to-be-migrated Medical Centers to enable EHRM migration and training
- Deliver VAA in Packaged form for use by third parties on any VA Medical Center
